Judge Name: Tim Hughes

Judge Name: Siapha Kamara

Comment: This is a definitive an innovative approach that makes access to information easier and faster; . This one-shop stop platform is definitely what is required in many countries and institutions. Reducing the bureaucracy empowers citizen to want to engage and influence governance.

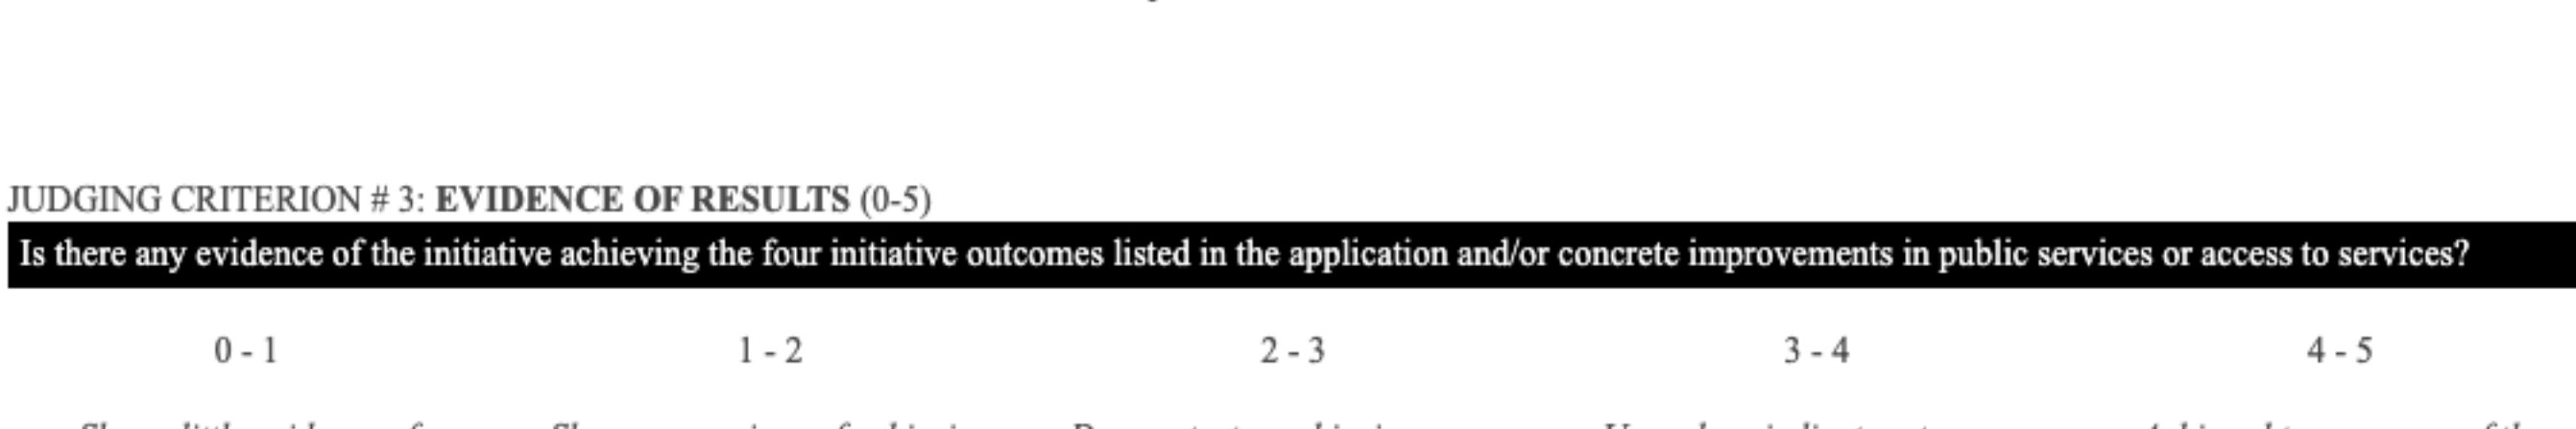

Judge Name: Tanvi Nagpal
Score: 3.8
Comment: The goal of the initiative is to centralize access to all information regarding the services that the government offers and remove duplication. It uses one impressive data base which brings together data from hundreds of agencies. The goal of the freedom of information site is not however to improve service delivery per se but to improve access to information.

Judge Name: Radu Puchiu
Score: 3.0
Comment: The project is focused in increasing access to information by building a Freedom of Information Central Website (FOICW) which aims to serve as the main platform on which information already provided by the authorities, as well as information about agreements and contracts with private parties. It affects a large number of population.

Judge Name: Ritva Reinikka
Score: 4.4
Comment: The initiative makes an exceptionally compelling case for increasing access to information by using modern technology. This initiative is most likely to increase transparency and public accountability in a big way -- in the entire country. It is interesting to note that centralizing in this case makes eminent sense from the citizen point of view.

Judge Name: Ritva Reinikka
Score: 3.0
